DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the Group I invention in Paper No. 9 is acknowledged.
2. Claims 32-67 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.
3. A proper response to this action must include cancellation of the nonelected claims.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 1-3¹~~2~~ and 68 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear as to what applicants believe their invention to be as the specification states that the cartridge holder (18) is used on a standard screw gun and that it will accept various "cartridges", thus it appears that the "cartridges" are not part of the screw gun, nor are the screws. The various dependent claims only contain structure to either the cartridge or the fasteners (screws) and thus it appears that these elements are part of the holder, which clearly contradicts the specification, as filed. Also, claim 1 clearly recites "a cartridge" as being receivable within the holder,

Art Unit: 3723

however claims 2-9 and 23-27 recite the cartridge as part of the screw gun and holder assembly, thus there now appears to be two cartridges that fit into the holder. Claims 10-13, 15 and 28-31 add the fasteners as part of the holder and only further obscure the actual invention.

Claim 3 also recites a "means" for indexing the cartridge, however the only disclosed "means" in the indexing mechanism (51) and this is not part of the cartridge.

Claims 8 and 26 are ambiguous in that it is unclear as to what is meant by "include of first tapered portion".

Claim 17 has the camming means "in" the guide post, however claim 1, from which claim 17 depends, has it "on" the guide post and the two terms are different in meaning.

It is also unclear as to what is claimed in claim 68 as there is no "means" to "automatically slide" the holder on the guide post as this is done by the user during assembly or during use.

6. Normally a claim which fails to comply with the first and/or second paragraph of § 112 will not be analyzed as to whether it is patentable over the prior art since to do so would of necessity require speculation with regard to the metes and bounds of the claimed subject matter, **In re Steele**, 308 F.2d 859, 862-63, 134 USPQ 292, (CCPA 1962) and **In re Wilson**, 424 F.2d 1382, 1385, 496 USPQ 494, 496 (CCPA 1970).

Art Unit: 3723

7. The prior art is cited only as of interest at this time due to the ambiguity of the claims. It would appear that the broad claims, e.g. 1 and 14, would not be patentable over these references.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 703-308-1746. The examiner can normally be reached on M-Th (7:05- 4:35) first Fri. off.
